The yellow flag has disappeared from Santiago, but the Yellow Jack remains.

Spain had a large assortment of Mor ros when the war began. When it ends she will have little left but a yesterday.

The Spaniards have an advantage in using dummy guns of wood. They can hit the mark as well with them as with genuine modern cannon.

The rebellion in China is inopportune Strife in the "Flowery Kingdom" might result in such dismemberment that the peace of Europe would be endangered by a rush for the pieces.

Detailed reports from Subic bay are still lacking. The whole world, however, comprehends that the American commander was Dewey and that the Germans were pretty fresh.

The German undertaking to work the humanity racket in the Philippines was doomed to failure. The Americans, who were first in the field, have a supply of humanity sufficient for every demand

El Imparcial's (Madrid newspaper) assertion that the inhabitants of Cuba "do not wish to become Yankees" will make the American soldiers who are meeting the real Cubans smile loudly. There is no Yankee timber native in the West Indies.

The assignment of the cruiser Philadelphia to carry to Hawaii the American flag which is to formally announce the annexation of the islands is a happy coincidence. American independence was born in the Quaker City.

The spirit of the American seamen of the wars of the past animates the men of Sampson's fleet. One of the ships is reported to have discharged exactly 1776 shots in the fight which resulted in the destruction of Cervera's fleet,

The Dons are acquiring courtesy. In his letter to Gen. Shafter requesting a conference to settle the terms of capitulation, Gen. Toral referred to the Americans as "your great graces"— a much prettier term than "Yankee pigs."

Capt. Conchas of the Spanish navy was more successful in bringing the caravels to the World's Fair than he was in taking the Spanish warship on which he was serving out of Santiago. But in both instances he was warmly received by the

The New York man who gave a \$500 bill to a Chicago waiter, which the waiter decamped with, mistaking it, of course, for a "tip," got off very easily. A New York waiter, discovering the denomination of the bill, would have indignantly returned and demanded more.

The offer to Cervera of a permanent home at Tampa may be a boom project. There would be quite a colony of defeated and naval officers of Spain if they all located in one spot, in order to escape the taunts and hatred of the Dons who never smelled powder.

The fairness of the officers of the ships of the American fleet in giving credit to the men who did the real work of destruction will not reduce the volume of popular credit which the officers themselves receive. The American public admires manly heroes.

Delay is characteristic of Spanish character. The Spaniards are so accustomed to putting off themselves that even after the surrender of Santiago had been agreed upon they thought they could put off Gen. Shafter. They discovered. however, that there are times when Americans believe that "there is no tomorrow; there is only today."

Admiral Cervera's remark that had the searchlights of the American fleet illuminated Santiago harbor so that he could have seen his way around the wreck of the Merrimac he would have made his sortie at night, shows that Hobson's feat was fruitful, after all. Had Cervera emerged suddenly during the hours of darkness, he might have saved at least two of his ships.

Russia's attitude toward the Philippines is like that of the other powers. She would prefer to have Spain keep them, but if they are to pass out of the hands of the Dons she would rather have them go to the United States than to any other nation. Land hunger and fear that the other fellow will get a "hog bite" is the main cause of international disturbances

It transpires that the bulkheading of the lost steamer Bourgogne was in accordance with the obsolete transverse system. Had her compartments been subdivided by a longitudinal bulkhead running from bow to stern, she would have survived the collision. The danger of sea travel on modern steamers is mainly from collision, and travelers on ships that are properly bulkheaded are therefore reason

ably safe. The remarks of Maj. de Grandpre, the military attache of the French legation, who has just returned to Washington from Cuba, repeat what has heretofore been observed of American troops. The American soldier fights with his head as well as with his rifle and sword; that is, he captures every advantage on his own initiative, and takes it for granted that his superiors will endorse his actions. Machine-like armies are effective under certain condition, but individual strategy counts heavily in bush fighting.

ARMISTICE, AN

Rumor of First Direct Negotiations for Peace.

SPAIN TO REQUEST IT

Cossation of Hostilities While Terms of Capitulation Are Being Discussed.

London, July 25 .- It is announced in a special dispatch from Madrid, published here this afternoon, that the Spanish gov ernment has drawn up a message, addressed to the government at Wushing ton, proposing an armistice for the purpose of discussing the terms upon which peace with the United States can be arrånged.

"POOR QUEEN!"

Sympathy Expressed for the Heart-Broken Mother of Spain's Infant King.

Paris, July 25.-A special dispatch from Madrid gives the following account of the Queen Regent's daily life during the present crisis:

"Poor Queen!" This is the exclamation so often heard of late, day after day, as matters grow worse and worse, as the Spanish disasters repeat themselves and as the throne of the little King seems slipping from her hands, into which it was given in trust. I see her majesty looking careworn and anxious. Even her drives are becoming fewer and fewer. It would surely appeal to any mother in the world were she to see the way this Queen mother each day seems to cling closer and were she to see the way this Queen mother each day seems to cling closer and closer to her boy, as though to shield him from the dangers closing about him with almost fatal force. It is very touching to witness it. Her worst enemies recognize in the Queen personal qualities worthy of the highest admiration. The Queen used every means in her power to prevent war. Her great hope lay in Senor Moret (Senor Moret y Prendergast, the former minister of colonies) and he would have carried his point but for Senor Gullon, the former minister for foreign affairs. Today and ever since the war began, the great occupation of the Queen is to find the quickest way for its termination. At many of the councils of late held at the palace the Queen has burst into tears, beg-Queen has burst into tears, beg-ging and urging her ministers to seek a solution for the terms of peace, which they seem incapable of materializ-ing—peace, which the Queen with com-mon sense sees to be of such vital im-portance and which her ministers keep postponing with the word so fatal to Spain-manana (tomorrow).

The Queen has taken every chance of-fered in the council of putting in a word for peace, and little by little she has finally managed to bring the cabinet to her view and to thoughts of peace.

CAN BE ADJUSTED.

Man Who Knows Queen Regent's Views is Sure Peace Can be Brought About.

Madrid, July 24, 6 p. m .- (Delayed in transmission.)-The correspondent here of

versation with a person occupying a high position in the Queen Regent's household and whose duties bring him daily into intimate relations with her majdaily into intimate relations with her majesty. He said the quarrel between Spain and the United States is much easier of adjusting than is generally believed. The Queen Regent, he continued, naturally endeavored to avoid war and also she desires an honorable ending of it. Quite alive to the force of public opinion she holds strictly to the constitutional laws of the nation. It is an error to suppose the Queen Regent is under the pressure of the present or any government or that she is regardless of public opinion when it is in consonance with the true interests of the consonance with the true interests of the Spanish people.

The official quoted then added an important statement, saying: "The present government will not initiate peace, but a modified cabinet, headed by Senor Gamazo, minister of public instruction, will con-clude the negotiations and then retire and Gen. Polieveja, with a combination including Senor Silvela and Gen. Campos, will

reorganize the country.

"Everybody considers that Spain should treat direct with the Americans, whose practical good sense will prevail over spread-eagleism."

ALL GLAD TO GO HOME.

Spanish Soldiers in the Interior of Cuba Are Overjoyed at the Prospect

Santiago, July 24.—Col. Angel Rosill arrived here yesterday from Gen. Pareja, military governor of Guantanamo, to ascertain from Gen. Toral if the report of the capitulation was true. As the result of Gen. Toral's answer, the 6000 Spanish troops at Guantanano will, tomorrow (Monday) surrender and lay down their

This afternoon Lieut. Miley of Gen. Shafter's staff returned from Palma, Soriano and San Luis, where he received the surrender and arms of 3405 men, of whom 3005 are Spanish soldiers to be deported. At first they refused to credit the statement that Santiago had surrendered, but the presence of the Spanish officer who accompanied Lieut. Miley finally convinced them and then they displayed great delight at the procpect of returning

All the surrendered troops are suffering from disease and starvation and Gen. Shafter has instructed the immediate for-warding of relief. He has informed the warding of relief. He has informed the Spanish officers that their families will be given transportation to Spain with food at the expense of the government and that the maintenance of the men is provided for by contract.

SAMPSON'S REPORT.

It is a Plain Statement of the Facts Connected with Cervera's Capture.

Washington, D. C., July 25 .- The official reports concerning naval operations off the east coast of Cuba culminated in the destruction of Admiral Cervera's fleet will be made public by the navy department tomorrow afternoon for publication in the newspapers of Wednesday morn-

ing.

A statement to this effect was made by Secretary Long today. The delay in giving them out is said to be due to the fact that they cannot be copied before tomorrow afternoon.

There are several reports and they include nearly a complete history of naval operations around and about Santiago. The principal report is made by Acting Admiral Sampson as commander-in-chief of the naval forces in Cuban waters and it is accompanied by the reports made to it is accompanied by the reports made to him by Commodore Schley, who was on the cruiser Brooklyn in active command of the fleet which destroyed the Spanish fleet; by Capt. Evans, commanding the battleship lowa; by Capt. Clark, commanding the battleship Oregon, and by Capt. Taylor, commanding the battleship Indiana. The reports of Capt. Philip, commanding the battleship Texas, and Commodore Wainwright of the auxiliary cruiser Gloucester, which vessel took a Commodore Wainwright of the auxiliary cruiser Gloucester, which vessel took a prominent part in the chase and destruction of the Spanish vessels, will be withheld from publication for the present.

Secretary Long said that in view of the decision to give the report out in full tomorrow evening he did not feel at liberty at this time to disclose even the general character of their contents. In response

character of their contents. In response to a direct inquiry, he did say, however, that Admiral Sampson's report was a plain statement of the facts connected with the destruction of the Spanish fleet and "showed conclusively that there was no friction between the officers" in con-

The supposition is that they were brought to New York on the auxiliary cruiser St. Paul and sent from New York to Washington by mail.

TO JOIN GEN. MILES.

Gen. Brooke Proceeds from New port News Without Waiting for Ali His Troops.

Washington, D. C., July 25.-Maj.-Gen. Brooke, commanding the First Army corps, will sail today from Newport News to join Gen. Miles at Porto Rico.

The general will embark on the St. Louis, and as he will proceed immediately without waiting for the whole of his command he should arrive off Porto Rico some time Friday or Saturday. The St. Louis will be accompanied on the run down the coast by the St. Paul, on which will be the headquarters of Gen. Haines. The remainder of the troops in Chickennus.

the headquarters of Gen. Haines. The remainder of the troops in Chickamauga will be embarked at Hampton Roads as rapidly as possible and it is expected the last of them will be aboard ship by Wednesday.

The reported boarding of a German steamer off San Juan, Porto Rico, br launch from an American naval vessel is taken at the war department to confirm its belief that Gen. Miles has arrived there. It is recalled, however, the of the vessels of the auxiliary fleet have been blockading San Juan, and

vessels instead of from Miles neer was seen by the German vessel. However, the department has no manner of doubt that Miles is off Porto Rico and as all of the details of the expedition are moving with precision there is every reason to believe that the troops will be all ashore by the end of the week. Col. Hecker, who is directly in charge of the transportation arrangements here, retransportation arrangements here, re-turned to Washington from Fortress Mon-roe, entirely satisfied with the progress being made there in the embarkation of Gen. Brooke's command.

TROUBLE IN SPAIN.

Disorders in the Interior Provinces -News Suppressed by the Censors.

Paris, July 25.—Private letters received here from Madrid say that the internal disorders in the Spanish provinces con-

tinne.
Some demonstrations have taken place at Granada, supposed to be due to the opposition manifested towards the octroi tax and local disputes, but in view of the rigorous censorship on all questions of public order it is difficult to ascertain the

facts.

At Gargaria, in the province of Barcelona, a mob recently lired on the gendarmes, and an armed band, said to have been composed of jailbirds, has appeared at Banoe and Valdorres. Thus far the efforts of the authorities to capture them have been furile. have been futilc.

Great precautions were taken at the open-air theater in the Buen Retiro gardens, in Madrid, Friday evening, owing to an expected demonstration in favor of Gen. Weyler, who was present, but nothing developed.

TO BLOW UP A SHIP.

Dynamite with Clock-Work Mechanism Found on the Port Victor.

New York, July 25 .- A letter written to a prominent officer here and received by Capt. William C. Brackley of the refrigerating and supply ship Port Victor, says that an attempt was made to blow up the ship when she was three days out. He said that a box containing thirfounds of dynamite and guncotton was found, without any address, on the main deck of the steamer. A clock-like mechanism had been arranged by which the explosives were to be set off. The box and explosives were thrown into the sea. The Port Victor left New York July 14.

CARLOS AT LUCERNE.

Lucerne, Switzerland, July 25.—Don Carlos, the pretender to the Spanish throne, has arrived here with his wife and aide-de-camp.

BRAWN FOR THE NAVY.

Recruiting Expedition in the West was Beneficial.

Washington, D. C., July 25.—The navy has, suspended for a time its efforts to recruit sailors in the West and Command-er Hawley and Chief Engineer Harrie Webster, members of the board, have returned to the navy department. The work was successful beyond the expectawork was accessing deyond the expecta-tion of the projectors of the trip and the results, it is believed, will be highly bene-ficial to the navy generally in infusing into it an element of western blood and brawn that will tend to the nationalization of that service.

CHINA SELLS RIGHTS.

Anglo-Italian Syndicate Gets Valuable Railroad Privileges-Must Watch Our Chance.

New York, July 25 .- The Tribune publishes the following from the correspondent at Pekin, China: The railroad situation in China is rapidly improving. Conservatism has apparently been as last thrown overboard and the government is dealing out contracts and concess sions with almost a reckless hand. The only completed line in the empire is that from Pekin to Shan Hai Kuan, via Tien Tsin, a distance of about 250 miles, but the road from Pekin to HanKow, known as the Lu Kow railway, because it connects with the Pekin-Tien Tsin line at Lu Kow bridge, is being pushed forward as rapidly as the rails can be furnished by the Han Yang Iron works at HanKow. sions with almost a reckless hand.

The private lines so far authorized are the Han Kuang line from HanKow to Canton, a valuable concession, which has Canton, a valuable concession, which has been granted to the American Washburn-Carey syndicate of New York. Then there is a concession granted to Dr. Young Wing to procure foreign capital and build a trunk line from Tien Tsin to Shanghai. This line will ultimately be the best business venture in China. The latest road authorized is that granted to the Russo-Chinese bank. This road runs from Tai Yuan Fu, the capital of the rich province of Shansi, to Chang Ting Fu. on the Lu Han line, thus connecting with the trunk line south.

"OLD NOBBY" IS DEAD.

Old Lake Superior Indian Who was Ashamed to Remove His Hat.

Marquette, Mich., July 25.-[Special.]-There died in Munising last week an old Indian who was over 100 years old and who has not been seen with his hat off for more than thirty years.

Old Nobby—his right name was Nahbey-quan—was the nestor of all the Indians along Lake Superior excelling in years the Objibwas, who now lives in a little house on Presque isle at Marquette.

No one can tell Old Nobby's exact age, but he is believed by everybody there to be fully 100 years as he claimed. His looks certainly bore out the assertion. In-dians who knew him over fifty years ago say they do not remember when he looked

say they do not remember when he looked any younger than at the time of his death. According to his own story, he was born on the present site of East Munising and has lived around Munising bay all his life. Since he first opened his baby eyes on the "shining big sea water" monarchies have crumbled to decay, others have risen and the genius of the Yankee has revolutionized the industrial world. But of all this he has been oblivious. He has hunted and fished and paddled his birch canoe on all the lakes and streams with which on all the lakes and streams with which the region abounds, satisfied to solve the natural mysteries of the trackless Lake

Superior country.

The most remarkable thing about the old fellow is that he has not removed his hat in public, or in the sight of anyone, in thirty years. He is bald-headed, and such an affliction is a disgrace among the Indians. He felt this disgrace so keenly that he al-ways kept his hat on even at meals. The Indians respected the old man's feelings and when they came to bury him bought a cap to hide the off-ending bald pate from The rest of his outfit was provided by W. A. INJURY PERMANENT.

Prince of Wales is Likely to be Crippled for Life-Fear an Operation.

London, July 25 .- Despite the cheerful and united efforts of the press to depict the Prince of Wales as rather healthier and gaver than ever under his affliction. the fact remains that there is a strong popular undercurrent of apprehension. He has too weak a heart action to make the use of anaesthetics safe, and the stu-pid blander of bringing him all the way by a slow train to hot, bad-aired London by a slow train to not, bad-ared London, when the great surgeons should have been rushed by a special out to Ferdinand Rothschild's superb country seat, aggravated the fracture so that an operation without them now would be too dangerous to risk.

Lord Lister, who is himself the most dis-tinguished advocate and exponent of the operation of suturing the bones of the patella by silver wires, which his antiseptic discoveries have rendered relatively safe, would be the last in the world to advise against this operation if he had not the

gravest reasons.

It is admitted that as a result the It is admitted that as a result the Prince will always be lame, and one might be sure this would have been avoided, if possible. The explanation is taken to be that blood poisoning is feared as a consequence of the use of the knife. This is late July, within a few weeks of the time when the Prince habitually goes to the German baths and takes heavy courses of the medicinal waters. Although now for years he has dicted painstakingly, and despite laborious exercise, he still has unhealthy blood, and this is peculiarly the sort of thing in which blood poisoning may intervene.

MEMENTO FOR SCHLEY.

Admiral Cervera's Compass Recovered and Presented to American Commander.

Off Santiago de Cuba, July 25.-There were two curious incidents on the fleet a few days ago. A boat's crew with diving apparatus was sent from the Brooklyn to examine the Infanta Maria Teresa, the flagship of Admiral Cervera. Among the flagship of Admiral Cervera. Among the terrible wreckage made by the big guns and the exploded magazines they found a standard compass, by which the ship was steered and which had tumbled down with the bridge. It was a heavy thing, but they brought it over, and by permission of Capt. Cook presented it to Commodore Schley. It was a curious sight, and withal a pleasing one, to see these seamen, bubbling over with affection for the commander, shuffle onto the quarterdeck, where Commodore Schley was reading. One of the men, representing the entire crew, and two men following him and carrying the thing, stepped close to the commodore, and then

lowing him and carrying the thing, stepped close to the commodore, and then the spokesman, in a stammering voice, said: "Sir, the crew would like to make you a present."

Schley was on his feet in an instant, his glasses in his hand and his paper on the deck. The spokesman hesitated. "Well, my men," said the commodore, with an encouraging smile, and the spokesman, hitching at his trousers, continued: "We found this compass on the Spanish admiral's ship, and we thought as how we would like to give it to you to remember how you whipped them."

"Well, my men," said the commander, with a tremor in his voice, "I am much obliged to you, but the great credit of that victory belongs to you boys—the men behind the guns. Without you no laurels would come to our country. Thank you."

There was a hearty three cheers from the men, and then Donnelly, a gunner's mate, thinking that something should be said in answer, touched his cap and blurted out:

IN DARKEST CHICAGO.

Montana Stockman Parts with More than \$20,000 in a Couple of Weeks.

Chicago, Ill., July 25 .- Samuel Dunno, a cattle dealer from Miles City, Mont., came into the Harrison street police station today and asked to be sent home as he was without money to buy his ticket. Dunno first came to Chicago July 18 and was robbed of four packages of bills, each containing \$500. He told the police he was on his way to the Polk police he was on his way to the Folk street station preparatory to making a trip to Canada when a woman called him into a doorway and robbed him of the packages. Immediately after reporting the loss of the \$2000 Dunno went out again and lost \$141 in the same manner. The next day he did not appear at the police station, and was not seen by the officers until today. He went to Canada from Chicago and there lost his trunk and has not been able to recover it. When he came back to Chicago last night on his way home to Montana, he had \$95 and in an unexplained manner he parted company with that today. The police fear Dunno is temporarily unbalanced mentally.

FLOATING DRYDGUR.

Government Has Bought One and will Take it to Key West-Was Much Needed.

Washington, D. C., July 25.-Chief Endicott of the bureau of yards and docks, has just returned to the navy department from New York, where he succeeded in arranging for the purchase by be government of a floating drydock, a naval adjunct very much needed at this time. The dock is capable of lifting vessels up to 2200 tons displacement, which will bring within its scope most of the gunboats of Sampson's fleet and a large number of the auxiliary vessels. This dock is not sectional, but in one piece, so that it may be easily towed to the point most available for naval use. The first journey will be to Key West, where the navy department has found a suitable site with pienty of water in what is known as Quartermaster's harbor, a cove not far distant from the town. The dock will be started on its way at the earliest possible moment.

PLOWING MADE EASY.

A New Invention-A "Stone Dodger" Plow.

From The Farm Implement News. The Fuller & Johnson Mfg. Co., of Madison. Wisconsin, have brought out a new implement, namely, a riding plow, new implement, namely, a riding plow, that is attracting much attention wherever it is seen. Heretofore there has been very serious objection to the riding plow where there is stone. In striking a stone not only has there been danger of breaking the plow and harness, but the blow on the shoulders of the horses was very injurious, and worse than all, the driver was in danger of being thrown off and injured. These objections are overcome in this appropriately named "stone dodger" plow. When it strikes a stone the plow part only is raised up and slides over er plow. When it strikes a stone the plow part only is raised up and slides over the stone and pulls itself into the ground again without any action on the part of the driver. The sulky part is not raised at all. A boy or an old man who can handle the team can thus readily do the plowing.

So much interest has been taken in this plow wherever it has been shown that this plow wherever it has been shown that the manufacturers have adopted a novel plan to aid in presenting its manifest advantages to the farming community. They are having a large number of models made and in any section where there is no samilar that the section where there is no samilar than the section where the section ple plow that can readily be seen, any reputable farmer can, by writing to the company, have a model sent to him by express for inspection, without expense to press for inspection, without expense to him, the company paying the expressage both ways. The farmer, after examination, simply returns it to the express office. The model is a nice piece of work. It weighs only ten pounds. The plow is made as a single plow for three horses and as a double or gang for four horses.

A very effective potato planting attachment can be had with these plows at small extra cost. extra cost.

Education in Finland.

Consul Smith at Moscow has made a report to the state department in regard to port to the state department in regard to the education of children in Finland. "About 38 per cent. of the population of Finland," he says, "can read and write. There are 1400 schools, supported in part by the government; twenty-one of these are intermediate schools. Each of the 460 districts has an inspector besides a board of directors. Children commence school at the age of 10; from 7 to 10 they receive instruction at home from the parish priest. Co-education has been most successful in these schools. In Finland women share in all industries, and are especially capable as teachers. Both men and cially capable as teachers. Both men and women teachers receive careful instruction and preparation. They are treated with the greatest deference, nor are their duties contined to the schoolroom; they exercise a supervision over the selection of books for home reading, and during the summer vacations they accompany the children on excursions, giving them lessons from na-

Chickamauga Military Park, Ga., July 25.—No orders fixing the time for the departure of the remaining regiments of the First corps have been issued at Camp Thomas and these regiments, although expecting such orders every hour, are maintaining their regular routine. Maj. Gen. J. F. Wade, the new commander, has made no change in the methods pursued by Can Brooks, and states that he sued by Gen. Brooke, and states that he will not do so. The indications are that the entire First corps will not get away some time.

With two exceptions, the First corps regiments are entirely equipped. In those where anything is lacking it is only of a minor nature and will not hinder the regiment going forward on its expedition to Porto Rico.

As each brigade consists of about 4000 men, and as there are seven brigades to go out, this will cause a removal from Chickamauga of 28,000 men in addition to those already gone. It will require 150 cars of all kinds for each brigade, or 1050 four the seven brigades.

The salts of aluminum being insoluble in water, the consequence is that when such salts are formed the water can be strained and the impurities removed therefrom. What is regarded as the most practicable method of purifying water by this means is the trough method, as it is called, the trough being composed of plates of aluminum and zinc, or iron, six or eight inches apart. One end of the tank affords an entrance for the volume tank affords an entrance for the volume of water, which passes over the top of one plate and thence under the plate next to it, this being made practicable by the fact that the elevation of the several plates is different. In connection with this tank, or trough, there is an electric generator of moderate size, and, though aluminum will not form the negative pole of a current, the other plates used will. Now, it being always the case that, when Now, it being always the case that, when Now, it being always the case that, when an electric current comes in contact with water in this manner, it decomposes a certain portion of the fluid, as it were, the result of such decomposition is that ozone is formed, and oxygen freed; the meaning of this is the absolute extinction of life in any microbe or organic matter which the water might contain, leaving it—after meeting the purification which the salts of aluminum occasion—as clear and salts of aluminum occasion—as clear and healthful as the water that flows from

SLID ONTO A PITCHFORK.

Horrible Accident to a Dodgeville

Farmer While Stacking Hay, Dodgeville, Wis., July 25.--[Special.]—One of the most serious and painful accidents that has happened in this vicinity occurred recently to John T. Davis, a prominent farmer of the town of Dodgeville. Mr. Davis, with his neighbor, James Griffiths, had been making hay and had just finished a large stack. Davis threw his pitchfork over into the ground from the top of the stack and remained on the stack adjusting some ropes. Meanwhile Griffiths saw the fork on the ground and picked it up out of the way and stuck it into the ground near the stack with the handle up. After Davis had completed his work on top of the stack be wanted to get to the ground stack he wanted to get to the ground, sliding off the stack, unconscious of the presence of the fork, which struck him at the lower portion of the trunk, the handle entering his body five or six inches. His condition is most serious. Davis has a large family. He is a member of the Modern Woodmen of America.

TO RUN TO SUPERIOR.

Plan to Extend St. Paul Road from Chippewa Falls North.

Chippewa Falls. Wis.. July 25.—Officials of the St. Paul railway were in the city and aside from their visit on the minor mutters it was learned that the trip was also for the purpose of looking over the ground with a view to the extension of the road from this city to Superior. From what was gathered yesterday it is almost certain that the extension will be made in the near future. If the matter is decided favorably, surveyors would be sent here at once and the route laid out. It is the intention in the event of its going through to have it so surveyed as to connect with some of the larger logging roads in the northern part of the state, pass through Hayward and from there on a direct line to Superior.

YOUNG AT SIXTY.

Serene comfort and happiness in advanced years are realized by comparatively few women.

Their hard lives, their liability to serious troubles on account of their peculiar organism and their profound ignorance concerning themselves, all combine to shorten the period of usefulness and fill their later years with suffering.

Mrs. Pinkham has done much to make women strong. She has given advice to many that has shown them how to guard against disease and retain vigorous health in old age. From every corner of the earth there is constantly coming the most convincing statements from women, showing the efficacy of Lydia E. Pinkham's Vegetable Compound in overcoming female ills. Here is a letter from Mrs. J. C. Orms, of 220 Horner St., Johnstown, Pa., which is earnest and straight to the point:

"DEAR MRS. PINKHAM:-I feel it my duty to tell all suffering women that I think your remedies are wonderful. I had trouble with my head, dizzy spells and hot flashes. Feet and hands were cold, was very nervous, could not sleep well, had kidney trouble, pain in ovaries and congestion of the womb. Since taking your remedies I am better every way My head trouble is: all gone, have no pain in ovaries, and am cured of womb trouble. I can eat and sleep well and am gaining in flesh. I consider your medicine the best to be had for female troubles."

The present Mrs. Pinkham's experience in treating female ills is unparallelled, for years she worked side by side with Mrs. Lydia E. Pinkham, and for sometime past has had sole charge of the correspondence department of her great business, treating by letter as many as a hundred thousand ailing women during a single year.

NATURAL LAW. There are some things that we all take for granted in the common course of life and follow without thinking and that is that certain causes always produce certain effects every time. We little realize how much our happiness and lives depend on this fact that like causes produce like effects. Take a plant, corn for example, drop a kernel in

the ground that is carefully prepared for it. If it is tended to in the right way, receives the right amount of moisture, heat, light, etc., the result will be a perfect plant and perfect ear of corn. But if any of the conditions are not perfect the corn will not be perfect. The relation between cause and effect is what we call Natural Laws, If all the Natural Laws or conditions that lead to success in raising corn were put together and classified the result would be called the science of raising corn. The science of any subject consists of the grouping together of the Natural Laws pertaining to that particular subject as far as they are known. Natural Laws differ from laws often evaded and fail to accomplish the ence is always paid if the conditions for at the windows. raising perfect corn are not all observed
