British Subject Who Falsely Swore He Was a Citizen of the United States is Convicted by Philippines Court Martial.

ST LOUIS, April 28.-Ernest Wilde, a British subject, occupies a cell in awaiting transportation to the federal prison on Alcatraz Island off the California coast to serve a ninety-nine year sentence for treason to the United States. If he had not falsely sworn that he was a citizen of the United States he could not have found his way into his present miserable | 1 had a predicament, for he would not have paper. been accepted as a recruit for the United States army in St. Louis, Dec. 5. 1899, and shipped to the Philippines.

Wilde had been in active service on Luzon Island only about one month when he disapeared from the camp of Company B of the Twelfth Infantry at a town called Penequie, fifty miles from Manila. For twenty days he remained absent. Then he turned up in Tarlac and surrendered. He said he had been captured by the insurgents and with much difficulty had escaped. With him was a soldier named Kenny from the Fourth Cavalry, who

told the same story. Instead of taking Wilde's word and permitting him to rejoin his command the commanding officer at Tarlac or dered him before a general court-mar-tial, charging him with desertion and specifying that he had quit camp to join and fight with the Filipino insurgents. On this charge and specifi cation Wilde was convicted.

came.

The cattle shortage has been greatly exaggerated, and in steers does not exceed over 1,300,000, as compared with the last stock census, dust 10. 000,000 steers are now on the ranges. Hogs and sheep are in excellent con dition, and the supply apparently is

ample for ordinary demands. Part of Railroads.

Combinations of the railways with the big packing firms have existed to the injury of the competitive stock raisers and packers. Prices to cattle sellers have been

regulated by either a one-man market as in St. Paul or by nutual agreement meetings of packers' representatives, as in Sioux City.

No incorporated beef trust is al-leged, but a distinct public opinion exists that all buying and selling of cattle is regulated by six big packing firms, without regard to natural conditions.

That excessive storage facilities and railway rebates have enabled the big packers to monopolize and manipulate the live stock and dressed beef markets, and incidentally poultry and eggs. That the conditions now existing in

the live stock and dressed beef markets are similar to those discovered by the United States Senate in 1890.

Community of Interest.

That the investigation of the interstate commerce commission in January of this year sustains the charges now made as to a community of interest hetween packers and railways.

That the cattle supply condition of Mexico is fair, but that the American tariff and severe inspection laws prevent that country's product competing in this market.

That there is a cattle shortage in Canada due largely to export trade, and that prices are high; that Cana-dian cattle are barred from this country by tariff impositions.

That under the Dingley law the duty on beef cattle is 27 1-2 per cent; a steer worth here \$100 would cost if brought from Canada \$127.50. The duty on sheep is \$1.50 a head; on fresh beef, veal, mutton and pork, 2 cents a pound.

Tariff and Rebates.

That between the protection of the tariff and the rebates of the rallways the packers of the country controlled 400,000,000 pounds of stored provisions on the opening of this year on which a 1 cent advance in price meant a profit of \$4,000,000.

Interesting Changes in a North Dakota Lake.

On of the interesting problems which has come under the notice of he hydrographers of the United States Geological Survey is the grad-ual drying up of Devil's Lake, or Lake Minnewauka as it is called by the Indians, once the largest body of water in the state. It belongs to the numer ous class of lakes formed by the great glacial ice sheet on its final retreat coward the north. Then and for some time after, when it was fed by the heavy rains following the glacial per od, it had an outlet to the south into the Sheyenne River; and a well mark-ed and empty channel still remains between the lake and the river. Long before settlers first came to the region in 1880, the lake had sunk below the level of this channel and has since been without an outlet. Regular observations for the last nineteen years show a steady and almost uninterupted sinking of the water. Groves of trees, which once stood at the beach, are now separated from it by broad strips of sand, and the shallow parts of the lake, notably the long arms and bays, have been left quite dry.

Another important and interesting feature is the change in the water from fresh to salt; this has taken place within the memory of man, and is in some particulars producing un-M, favorable results. Fish were found in the lake in great abundance up to 1888; since then they have grown rapidly less, until now practically none are caught. The United States Geological Sur-

vey has recently established a bench mark near the lake, and, under the charge of Prof. C. M. Hall, of the State Agricultural College, will make careful records of the fluctuations of the waters and a general study / of their decline. The investigation their decline. The investigation promises most interesting results

which may throw some light upon the climatic conditions of the past. LIKE A DROWNING MAN.

o'clock. Last weeks' windstorm did great havoc in this section of the county. Those suffering the most heavily from its effect are John S. Morris and O. Rowlands. The former had all his out buildings blown down, killing one horse, a cow and several hogs and the yard was covered with dead chick-ens. If the storm affected the hens in other places as if did at Mr. Morris' eggs are sure to be higher in price than at present. The effects of the storm was seen at Mr. Rowland's when the family saw the roof of one of the barns being blown entirely away. However, ho one was injured.
