

# Summer Fashions Tell a Story Of Fascinating Color Trends

By **CHERIE NICHOLAS**

IT IS with a lavish hand that fashion dealt out color during the spring season, and the emphasis on color glamour in the style picture is rushing on at a fast and furious rate in the summer program.

It is not only that designers are making a brilliant record in carrying out color technique that gives full play to the imagination in the matter of almost unbelievable combinations that either contrast or blend, but the fact that featured individual colors are in themselves so refreshingly "new" and out of the ordinary makes this a season that fairly thrills with excitement. Speaking in general, the scheme of things seems to indicate gowns and suits styled with sophisticated simplicity, yet so strikingly colorful there's never a dull moment throughout the current fashion program.

Two outstanding trends that lead to a new high in color glory in the summer picture stress flattering, romantic grays in soft sheers for both day and evening wear, and also a mad rush for dresses, coats, millinery and accessories done in bright yellows, lemon yellow being most important of all.

The flattery of these colors is told in the two handsome, summery costumes pictured in the above illustration. In each instance it is color that exultantly gives drama to the ensemble. The simple dress, topped with a swank, short box coat, shown to the right presents a monotone color scheme in the very new lemon-yellow. The dress is the newly approved length with the straight skirt which is on the way for fall. The sleeves are short, as most sleeves are wont to be in summery frocks. A wide girdle belt of self-fabric fastens in front with a square covered button. The coat has cuff-

less bracelet-length sleeves. The hat is in matching yellow straw with white polka dot veiling draped under the chin.

With ladies of fashion who appreciate the refined loveliness and subtle flattery of soft grays a preference is growing for costumes made of exquisite gray sheers having an air of distinction about them that makes definite appeal to discriminating taste. The smartly styled summer gown pictured to the left in the above illustration is in this class which dramatizes sophisticated simplicity which conveys its message through style-correct color. It is detailed with touches of charrreuse, and the wide-of-brim sun hat is carried out in charrreuse.

Speaking of color importance, "ginger" is very much exploited this season. The fashion-alert are wearing colored straw hats with their black, navy or white dresses and suits this season, and the popularity of this color is reflected in entire costumes, from hat to shoes, carried out in monotone ginger with which topaz jewelry is effectively worn. Considerable attention is being given to brown-and-white alliances. This is especially noticeable in the latest prints, so many of which are in brown patterned on a white background or in white on brown. Hats of brown straw that are be-ribboned in white are also fashionable.

Color is especially carrying on at a fast and furious rate in the realm of play clothes and casual daytime apparel.

## Grooming Essential To Chic Appearance

Now that wartime chic is ushering in simplicity in dress, placing special emphasis on practical suits, it becomes more than ever essential that special care be given to the matter of neat grooming.

A simple, becoming hair-do, a fresh looking complexion, a sparkle in your eye and you will look attractive no matter how simple your suit or your uniform.

Economy is the better part of beauty these days, so the busy woman will find it practical to invest in some basic, many purpose products. One of these is witch hazel. Borrow the good qualities of this old standby from your medicine chest, and give yourself a facial. Witch hazel applied with a piece of cotton cleanses, freshens and tones up the skin all in one quick operation.

And be sure to take good care of your clothes. Brush them often and have them cleaned when necessary to preserve the life of the garment.

Brush your hair, scrub your face, file your nails to an efficient oval and you will find that, although all this takes a little time, it will pay one of the most priceless dividends—the chic appearance only good grooming can give.

## Fine Batiste

In the revival of exquisitely fine batiste for the making of "nightsies" and foundation slips an old fashion is becoming a new fashion. In the better lingerie departments and specialty shops a revelation of lovely lace-trimmed and finely tucked garments is to be seen reminiscent of grandmother's cherished wardrobe of dainty "undies."

## Bows on Parade

The new slim silhouette advocated by the War Production board in its fabric conservation efforts is smartly interpreted in this New York creation of brown crepe animated by pert little bows of brown and white polka-dotted crepe. Bows are certainly going on parade this summer in unexpected ways. This scatter treatment, for example, animates the dress neckline to hemline. The large cartwheel hat is of white sheer straw. Note the flattering border of brown horsehair mesh. And the hat, in a clever style gesture, buttons on.

## Sick Soils Have Effect on Animals

Earth Should Be 'Factories,' Not Mines

By **DR. WILLIAM A. ALBRECHT**  
(Department of Soils, College of Agriculture, University of Missouri.)

That sick soils will not build healthy animals any more than they will produce sturdy field crops is significant in view of our national tendency to combat soil erosion by allowing much of the fertility-depleted soil to go back to grass.

In place of giving attention to soil fertility measures that feed growing plants, we have too often adopted the practice of "crop hunting" in the mistaken belief that when one crop starves another can be found that will thrive on the same depleted land. But we can't breed crops against starvation any more than a sterile parent can transmit the character of sterility.

Evidences of declining soil fertility are seen in the greater number of deficiency diseases among our farm animals. Veterinarians are constantly faced with increasing cases of strange animal ailments for which no specific body weakness or visible physiological cause can be found. Eye ailments, a tendency to blindness, bad gaits, rounded back lines, inferior condition, poor feeding progress, and even debility and death can be traced to deficiencies in animals' nutrition.

If newer legumes or non-legumes grow more successfully on less fertile land, then such crops must be taking less nutrient from the soil. Thus these crops can offer the animals that feed on them less of protein and of ash which, for animals the same as for plants, are the items drawn from the soil.

### Animals Limited in Feeding.

Confined as they are, animals are limited in their feeding by the soil fertility of the farm. Supplements such as proteins contain too little of the minerals needed. And when animals protest by rooting up the very earth or climbing the fence in search of better forage, such actions are met by rings in the nose or cumbersome yokes about the neck. Human serfs have been prohibited in this country for about 75 years, but animal slaves can be seen on any trip through the country. Too often they are almost in a state of starvation because their master, the farm owner, neglects his soil fertility.

Our soils must become factories instead of continuing as mines from which the fertility is unendingly drawn. Raw materials such as limestone, phosphorus, potash, and other fertilizing elements, organic matter and other plant nutrients must go back into the soil. In our "soil factories" we must produce more usable nutrients for plant service. Such nutrients must not be hauled off unless equal amounts are restored.

### Consumption of Fats, Oils

Recently the United States used approximately 6½ billion pounds of fats and oils in edible products; two billion in soaps, one billion in paints, varnishes, printing inks and linoleum products, and 0.5 billion was used for a variety of industrial purposes.

### Cutting Costs

The department of agriculture is strongly urging partnership in use and purchase of equipment.

Two Floyd county, Texas, farmers have been showing their neighbors the value of this kind of joint action. These Farm Security administration borrowers first bought a tractor outfit

together in 1940. Sharing the \$1,030 outlay and the operating expenses proved to them the advantages of partnership.

Their second enterprise was buying a pure-bred Jersey bull, which cost \$150. Then they bought a seven-foot power-take-off mower, a feed mill mounted for transport, and a ground-driven row binder.

The two farmers say that the machinery they joined in buying saved their crops last fall. They figure that what they did as a common sense plan will have to be done by others from sheer necessity.

### Urea for Growing Lambs

Farmers were told of tests in the laboratories of a university's division of animal nutrition in which the performance of growing lambs fed urea was compared with that of lambs fed diets containing such protein sources as soybean oil meal, casein, skim milk and corn gluten feed. With rations of a 12 per cent protein level, 50 per cent of the nitrogen as urea is as satisfactory a source of nitrogen as commonly used protein concentrates.

## PATTERNS SEWING CIRCLE

A FLOUNGING skirt, fitted "long torso" top and kimono sleeves are the leading features of the pretty pinafore frock for girls offered in Pattern No. 1602-B. It buttons down the back—and at the shoulders and is as cool and comfortable to wear on a hot day as a romper suit would be.

Run ric-rac edging around the edges of the kimono sleeves, the neckline and shoulders—and use

### Sound Sleep

First Recruit (the morning after his first 15-mile hike under full pack)—Boy, did I sleep last night. I slept like a log.

Second Recruit—Yeah, man. Like a log with a saw going through it.

One thing a soldier is afraid of is a display of emotion. That's why his slang so often sounds derogatory. For example, he refers to the silver eagles on his colonel's shoulder straps as "buzzards." But when he speaks of his favorite cigarette, he says: "Camels." They're first with men in the Army as well as with Sailors, Marines, and Coast Guardsmen. (According to actual sales records in service men's stores.) A gift of a carton of Camels is always well received. Local tobacco dealers are featuring Camel cartons to send to any member of our armed forces. Hint for the day: Send "him" a carton of Camels.—Adv.
