He leaves surviving him his wife Katherine and one daughter, Margaret McCarthy, three sons, Frank, Jr., Joseph, and George, all of Caledonia.

### Loses Leg

An auto accident which nearly cost the life of Mr. and Mrs. Goody early last Friday morning brought gloom over the entire community. As Mrs. Goody was driving Mr. Goody to Milwaukee where he is employed by the Chain Belt Co., their car skidded on the icy hill at Barney's Corners on Highway 59 and struck a culvert injuring both of them slightly and stalling their car partly across the road. Both alighted from the car and waved to the oncoming cars so they would not collide with them when a car driven by Chas. Dewey of Mukwonago hit Mrs. Goody, severing her leg and seriously injuring Mr. Goody. An ambulance from Waukesha took the unfortunate people to Waukesha hospital where their condition is said to be fair at this writing.

The occupants of the other car sustained minor injuries and were released from the hospital shortly after. The many friends of Mr. and Mrs. Goody are much concerned over these good people and hold all good wishes that their stay at the hospital will not be too long.

WEEKLY NEWS ANALYSIS

**New Ration Orders Assure Healthy Diet; Nazi's Kharkov Offensive Recalls Drive That Preceded Collapse in World War I; Congress Ponders Postwar Security Plan**

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)  
Released by Western Newspaper Union.

The direction in which the Nazis launched their counteroffensive against the Russians in the Kharkov area is indicated by the above map. Successful in its early stages, the counteroffensive had driven the Russ back 100 miles and regained for the Nazis areas captured by the Russ winter drive.

**WAR PROGRAM: Centralization Needed**

Like doctors in a clinic, members of the senate's Truman investigating committee gave the progress of the war program a thorough examination and emerged with three basic reasons for "nearly all the failures and shortcomings" found.

First reason was "inadequate over-all planning within government agencies at the beginning of the various programs"; second was "conflicting authority over various phases of the war program"; and third, "hesitancy of the government to adopt unpopular or unpleasant policies long after the facts indicated such policies were necessary."

In recommending corrections, the committee called for clearly defined authority, centralized in a few officials, during the coming year. Incidentally, the committee warned that the year ahead would be the toughest and grimmest in U. S. history.

**RATIONING: Healthy Diet Sure**

Americans tightened their belts in anticipation of the slimmer portions of meat, canned fish, butter, cheese and edible fats the new rationing regulations effective March 29 would impose.

To those who for months had been following the Food Administration's request to ration themselves voluntarily, the new estimated ration of about two pounds weekly of meat per person "more or less" represented only a slight shift downward. Still unrationed as the orders went into effect were poultry, fresh fish and such rarely used meats as rabbit and other game. The new rationing orders had been accompanied by the heartening news that coffee would be more plentiful, with one pound every five instead of six weeks, and that point values on dry beans and peas had been lowered.

All things considered, the new regulations would reduce consumption of the foods they covered by from 12 to 15 per cent. That supplies assured a healthy diet was emphasized by Food Administrator Wickard. Estimates indicated that 1943 per capita civilian supplies of meat, cheese, fats and other commodities would be about equal to the average for 1935-39.

**NORTH AFRICA: Axis Hopes Dimmer**

Holed up in the Mareth line after having received a punishing beating Nazi Marshal Rommel has had to face the consequences of being ringed in by an Allied line of steel. That those consequences were to be serious and might even reach the disastrous proportions of a defeat rivaling the Axis rout at Stalingrad was the opinion of seasoned observers.

Faced by the increasing strength of General Montgomery's British 8th army and by the reinforced and battle-seasoned American forces of Gen. Dwight Eisenhower, Rommel and his cohort, Col. Gen. Von Arnim, had their work cut out for them.

**HIGHLIGHTS . . . in the week's news**

**CANBERRA:** Diplomatic relations between Australia and Russia were brought closer together when Lord Gowrie, governor general of the commonwealth, received the credentials of the new Soviet minister, M. Vlasov. Lord Gowrie told the new envoy that "both our peoples are encouraged by the knowledge they are fighting for the preservation of their own way of life."

**ANKARA:** The elevation of Col. Gen. Rudolph Haarde to the post of commander in chief of German forces in Greece, Thrace and the Aegean area was reported here. He succeeds General Stuntz who was reported to have died in a railway accident in Bulgaria in which sabotage was suspected. Haarde was described as a close friend of prominent Bulgarian military leaders.

**TAX PLANS: Ruml Revived**

Like the cat with nine lives, the Ruml plan to skip a tax year and put America's 44,000,000 taxpayers on a pay-as-you-go basis, was hard to kill.

Even though the house ways and means committee had approved a plan imposing a 20 per cent withholding levy from pay envelopes effective July 1 and making "pay-as-you-go" optional with each taxpayer, proponents of the Ruml plan, principally in the ranks of the Republican minority, had ranged themselves solidly behind a bill embracing the Ruml principles.

Sponsors of the house ways and means committee's tax program pointed out that the withholding levy would not be a straight 20 per cent deduction against wages and salaries, but against the portions of such earnings remaining after deductions were made on the basis of dependents. The levy would not be an additional tax, but merely a means of collecting actual taxes through wage and salary deductions.

**LEND-LEASE: Diplomacy Weapon**

Predictions that lend-lease shipments in the coming year would dwarf all previous records and that Uncle Sam would use it more and more as a means of obtaining agreements with nations receiving it for postwar security, were voiced by Washington observers, after the house and senate had approved extension of lend-lease for another year.

What eventual payment this nation will seek for its wartime aid to its allies and friendly neutrals remained to be seen. Two major principles were involved, however. One was the promotion of a stable economic situation throughout the world after the war. The other was the necessity of America obtaining additional naval and air bases to help prevent a recurrence of Axis aggression.

A report to congress by Edward R. Stettinius Jr., lend-lease administrator, disclosed that aid extended by the United States under the act aggregated \$9,632,000,000 in its first two years of operation. Mr. Stettinius reported Russia was allotted 21 per cent of all lend-lease shipments last year, including half of all tanks shipped and 40 per cent of all tactical planes.

**CHINA AIR FORCE: Victory for Mme. Chiang**

The labors of Madame Chiang Kai-shek had not been in vain. One of the first fruits of her American visit and Washington conferences was the creation of a full-fledged U. S. air command in China.

Failed as the fulfillment of long-deferred Chinese hopes this move indicated a sizable expansion of

MME. CHIANG KAI-SHEK . . . first fruits sweet.

American air power in the China war theater and a new phase in the war against Japan.

Under the new arrangement the newly activated 14th U. S. air force under command of Brig. Gen. Claire L. Chennault replaced the former China Air Task Force. Famous as the trainer of the "Flying Tigers" which scoured Jap invaders, Chennault with augmented manpower and planes would now be able to expand his operations greatly.

**FRANCE: Patriots Fight**

As repressive measures by the Nazis had failed to halt the underground revolt by French patriots against conscription into German slave legions, it became clear that this movement was well organized and had the leadership of key men in General De Gaulle's Fighting French forces.

As hundreds of thousands of youths were reported fleeing from their homes to escape conscription, the flareup of anti-Nazi sabotage and terrorism resulted in the wrecking of German troop trains, the killing of Axis soldiers and attempts to assassinate pro-Nazi French leaders.

**PACIFIC FRONT**

Over widely scattered fronts in the East, Allied forces continued their battles against the Japanese. One major action in the Pacific area was reported from China's capital, Chungking, where it was announced that the Chinese had driven the Japs back toward the Burma frontier above Tung-yueh in the Salween river area.

In the Solomon Islands area, American dive bombers continued their attacks on Jap-held Munda, important sea and air base.

Medical officers have long recognized tobacco as an aid to morale among our armed forces. Surveys among the men themselves have shown that tobacco is their favorite gift. If you have a friend or relative in the Army, Navy, Marines, or Coast Guard who smokes a pipe or rolls his own, nothing would be more appreciated than a pound of his favorite tobacco. Prince Albert, the world's largest-selling smoking tobacco, in the pound can be recommended by local dealers as an ideal gift for men in the service.—Adv.

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

**PLACING A GUTTER**

A SHEET-METAL gutter along the edge of a roof should be set far enough out from the edge to catch the water that runs down from the roof; if it is too close to the edge, water will run over it, and if it is not far enough out, the water may go between the edge of the roof and the gutter. At the same time, the outer edge of the gutter should not be higher than the slope of the roof. If it is higher, it will act as a dam to catch snow and ice. When correctly placed snow and ice will slide over it; when not correct, water will back against the dam and flood upward. The pool that then forms may work its way under the roofing and leak through to the inside. The sizes of the gutter and of the leader pipe, of course, should depend on the area of the roof that is to be drained.

**Chimney Sweats**

Question: The chimney in my old house sweats in the upstairs part of the hall, ruining the paper and making the wall unsightly. A contractor advised gypsum wallboard over furring strips, with an air space between. What do you suggest?

Answer: If beads of condensation appear on the surface of the wall, the chimney may be too large for the furnace you are using, causing a downdraft of cold air that chills the wall. Check the furnace manufacturer's recommendation for the size of the flue. If yours is too large, reduce the size of the opening on top of the chimney. If there is an accumulation of creosote that seeps through the brickwork, your only remedy is to build a new chimney. However, if the trouble is only with condensation, the contractor's idea may be satisfactory.

**Covering a Steam Boiler**

Question: Our steam boiler is bare to the iron, and we should like to cover it with asbestos. How should we go about it?

Answer: Mix asbestos cement thoroughly in a tub or similar container, using only enough water to make a workable mixture. At least two coats should be applied. Put on a one-inch first coat and a half-inch second coat. Apply the first coat with your hands or a plasterer's trowel, leaving a rough surface. A trowel would be handy for scratching the surface. When the first coat is fairly dry, stretch and fasten chicken wire netting over the surface to hold the first coat. The second coat should be troweled down hard and smoothed as it dries.

**Spot Cleaning**

Question: What is the best spot remover for men's garments? I often spot my suit and I don't always want to have the entire garment cleaned merely for a single bad spot.

Answer: The kind of remover would depend on the nature of the stain; egg, coffee or ink, for instance, would require different treatment than grease spots. You can get excellent preparations, even for taking out lipstick stains, at a good drugstore. Many tailors and dry cleaners can "spot" clean a suit; that is, take out a spot without cleaning the entire garment.

**Poplar Roots**

Question: I have three 12-year-old poplar trees in my yard. Their roots have grown about 30 feet toward the house, and I am afraid they soon will cause damage to the house. I plan to cut off these long roots close to the trunk of the tree without taking them out of the ground, then drive a copper nail into the root to kill it. Do you approve of this idea?

Answer: Cutting the large roots close to the trunk may damage the tree. To get first hand information on this question, I advise you to write to the Department of Forestry at your state capital.

**Sticking Valve Stem**

Question: The radiator valves in my hot water system stick and are hard to turn. In fact, I snapped the stem of one when turning it with a pipe wrench. Can you suggest anything?

Answer: A new packing, the kind that contains graphite, may ease the valve stems. Your local plumber should be able to supply you with it.

**Sap Spots on Car**

Question: My car had to stand outdoors for some time, and sap from trees dripped down on the roof, leaving spots. How can I take off these spots?

Answer: You may be able to get them off by light wiping with turpentine. If this does not work, use the well-known auto finish cleaner

**Ukrainians Are Russians With Their Own Republic**

The Ukrainians are Russians, and they have a republic of their own which is a constituent member of the Union of Socialist Soviet Republics. By origin, however, they differ from the "Great Russians," and they have their own language. Their land is one of the most fertile in the world; hence the German desire to conquer it.

Ukrainians were often in conflict with the Czars of Russia, but the disappearance of their native aristocracy has demolished most of their nationalism.

**SNAPPY FACTS ABOUT RUBBER**

Indians of the Amazon River region made the first rubber overshoes, which were imported into the U. S. in 1800.

Mistakes of many kinds can cut into the rubber conservation program, as is indicated by the fact that normally 180,000 pounds of rubber was used annually in the manufacture of pencil mark erasers.

Before vulcanization was discovered in 1839 rubber goods hardened like rock in winter and melted in summer. Early rubber goods manufacturers suffered severe financial losses because of the unreliability of their products. That was many years ago.

A check of the tires on 800 vehicles recently disclosed that 80% were under-inflated, even to the extent of from 10 to 15 pounds. This is a heavy waste of rubber because it has been found that 30 per cent under-inflation permits the return of only 74 per cent of the mileage built into a tire.

IT IS easy to make draw curtains with the fixtures you have, plus a pair of large screw-eyes, some wood or brass rings, and about five yards of cord.

The screw-eyes are placed just under the hooks for the curtain rods; then run the cord through the screw-eye at the right; then through the rings, knotting it to the left ring at center; then through the rings and the screw-eye at the left; and back through the rings, knotting it to the right ring at center.

Now pass the cord through the rings and the right screw-eye and

**He Ate His Own Words, But Cooked Them First**

"It isn't what you eat—it's how you cook it!" That was the contention of Grimod de la Reyniere, the famous French gourmet who died in 1833, and to prove it he once literally ate his own words. He took a copy of his own book, "A Manual of Gastronomy," cooked it, and ate it! He suffered no ill effects.

Nearly 300 years ago, Theodore Reinking wrote a book which King Christian IV of Denmark held to be too democratic. The unfortunate author was eventually sentenced either to eat his own book or be executed. He chose to tear up his book and put the scraps in soup, which he ate!

**Navy Opportunity**

A special Naval Aviation Board will be in Milwaukee on March 17-18-19 to interview and give preliminary tests to 17-year old high school seniors and graduates who wish to enlist in the Navy Air Force for pilot training, according to a schedule released by the

Naval Aviation Cadet Selection Board at Chicago. The board will make its headquarters at the Navy Recruiting Station and will be present from 9:00 a. m. to 4:00 p. m., though applicants are urged to appear in the morning if possible.

Only youths who have in their possession a recommendation from their

high school principal or college head will be examined and given the preliminary physical and mental tests of the regular Naval aviation cadet examination. Men who pass these tests will be sent --at the Navy's expense to the Naval Aviation Cadet Selection Board for final tests.

On successful completion of the Naval aviation cadet examinations, applicants are sworn in as Apprentice Seamen, Class V-5. Later they will be transferred to aviation cadet classification, but will not be called for training until they have been graduated from high school and are 18 years old.

Youths who fail to pass the Naval aviation cadet examination are not required to enlist in the Navy, but those students who are accepted but do not graduate from high school by June 30 will be ordered to active duty in the Naval Service.

Complete details regarding this 17-year-old enlistment program for Navy pilot training may be obtained from the high school principal and college armed service representatives.
