John M. Von Rueden

A large crowd of sorrowing relatives and friends attended the funeral of the late John M. Von Rueden which took place Friday morning, June 18th from the Mealy Funeral home to St. Theresa's catholic church. Solemn High Mass was said by Father Wm. Muehlenkamp of Mondovia, assisted by Father Anthony Muehlenkamp of Sparta and Father Geo. Wollet of the home parish. Burial was in the family lot in St. Theresa's Oak Knoll cemetery. Six nephews acted as pallbearers. They were Gerald and Raymond Von Rueden, Howard, Wilbur, Robert Waldo and Howard Shearer.

Mr. Von Rueden was born July 3rd, 1877 on the farm where he lived all his life. He was the son of Joseph and Theresa Von Rueden, pioneer settlers of Eagle. On September 25th, 1923 he was married to Mary Muehlenkamp of Norwalk and to this union two children were born, John Anthony and Mary Ann. He held the office of Town Supervisor and Town Chairman for several years. Evidence of the esteem in which he was held in the community. Besides his wife and children he is survived by a brother, Geo. Von Rueden and three sisters, Mrs. Anna Agathen, Mrs. C. L. Shearer and Mrs. Ed Knetter, who have the sympathy of all in the loss sustained. May God grant him eternal rest.

WEEKLY NEWS ANALYSIS

Chinese Army Steps Up Anti-Jap Drive; Pantelleria Victory Prepares Way for Allied Sweep of Entire Mediterranean; Farm Implement Output Will Be Doubled

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

France officially repaid some of its debt to America when Gen. Henri Giraud (right) invested United Nations Commander-in-Chief Dwight Eisenhower with the grand cross of the Legion of Honor at a ceremony in Algiers.

MEDITERRANEAN: Pantelleria First Step

The Allied assault to reduce Italy's island buffer defenses preparatory to mainland operations had continued to give the Mediterranean area star billing over other theaters of war.

The capture of the island fortress of Pantelleria was significant not only because it was the first effective Allied milestone since the African victory, but it consolidated United Nations' control over east-west shipping in the Mediterranean as well. Moreover, by breaking through Italy's outer wall it paved the way for a cleanup of the more important islands of Sicily and Sardinia and for operations on the continent.

The steady and methodically violent destruction of Pantelleria's defenses was regarded as a forerunner of what other Axis Mediterranean bases would have to suffer. Day after day Allied bombers had plumbed disaster on beleaguered Pantelleria, while naval units had blasted its forts with deadly big guns in softening up operations.

In the meantime British dispatches crediting Spanish sources reported that Marshal Erwin Rommel was speeding the completion of defenses along the French Mediterranean coast. These reports set forth that Rommel had been named commander of the so-called Mittelmeer wall.

IMPLEMENTED: Output Doubled

Relief for farmers harassed by a shortage of machinery will be forthcoming as a result of WPB Chairman Donald M. Nelson's announcement that the production of farm implements for the year beginning July 1 will be doubled and the entire "concentration" program imposed on the industry last year will be scrapped.

Mr. Nelson's announcement said that allotments of steel and other materials will be sufficient to boost farm equipment production to 80 per cent of the 1940 level, compared with a current rate of 40 per cent and a quota of only 20 per cent that was in effect early this year.

Meanwhile farm equipment manufacturers were authorized by the War Production board to place orders for materials for the new program.

ARGENTINA: Axis Radio Curbed

Action of the new Argentine government in cancelling radio facilities which enabled Axis embassies or nationals to transmit code messages to their capitals was regarded as a step in the direction of bettering Argentina's relations with its South American neighbors as well as the United States.

The government said it took this step in compliance with the resolution adopted at Rio de Janeiro, Brazil, by American foreign ministers against Axis espionage in January, 1942. While the order cancelled radio code facilities for all nations, it struck at the Axis powers since they have no cable connections with Argentina, whereas the Allies are linked directly to Argentina by cable.

WAR PROFITS: 'Recapture' Scanned

Whether the year-old renegotiation law by which the government recaptures "excessive war profits" from industry would be retained or eliminated was a matter that would be largely determined by the public hearings which the house naval committee had ordered.

As the committee applied close scrutiny into the operations of the law, witnesses representing big and little industry described its effect on war production. Government officials credit the contract renegotiation statute with saving the nation thus far in excess of three billion dollars.

Decision to undertake the investigation came with two measures pending before the house ways and means committee. One was to repeal the statute altogether and the other was to limit its use to contracts above \$500,000 rather than the present \$100,000 limitation.

RUSSIA: Aerial Prelude

Air forays had continued to be the prelude to general 1943 land offensives on the Russian front as the lull that began with spring thaws still had persisted.

From one end of the line to the other reports indicated increasingly vigorous air battles as Nazi and Soviet planes fought it out for supremacy. Activity was reported especially pronounced in the Don river valley and northward in the vicinity of Leningrad. Russian communiques indicated that the vicinity of Rostov had become a cemetery for downed Nazi Heinkel and Junkers planes. The Reds reported likewise that in a German raid on the Volkhov front 60 miles southeast of Leningrad, 24 planes were shot down.

Meanwhile the Russians continued their attacks on eastern German air-dromes. In one foray the Reds reported destroying 160 German planes compared to a loss of 26 Russian aircraft.

ANTI-STRIKE: Penalties Promised

As the house had undertaken consideration of the compromise anti-strike bill, its sponsors declared that it would keep war plants and mines running uninterrupted by walkouts "if anything can."

Composing differences in bills previously passed by both house and senate, the revised measure was aimed particularly at the coal wage dispute. It authorized the government to seize strike-bound mines or plants, outlawed strikes in these facilities and imposed a 30-day "cooling off" period before walkouts could be called in privately operated war industries.

Penalties ranging from civil damage suits to a year's imprisonment and \$5,000 fine could be imposed on those who fail to carry out the measure's regulations in labor disputes or who instigate or conspire with others to aid a strike in a government-operated plant.

RIGHT HAND: Baruch for Byrnes

Official and unofficial Washington was cheered by the news that James F. Byrnes, war mobilization director, had drafted Bernard L. Baruch to serve as his right-hand man.

Mr. Baruch, chairman of the War Industries board in the first World war and long an informal consultant of President Roosevelt, will serve Mr. Byrnes in an advisory capacity and will have a "more formal connection with the government" than when he headed the President's special rubber-investigating committee.

The key role which Baruch's mobilization of national resources played in winning the last war, plus his respect and popularity among members of congress were cited by observers as reasons for his choice by Mr. Byrnes. The fact that the two will be working together was viewed as a harbinger of closer cooperation between the government's legislative and executive branches and more thorough-going efficiency in the home front effort.

FOOD: U. S. to Ship 25%

At least 25 per cent of American food production this year will have to be shipped abroad, Roy F. Hendrickson, food distribution director of the War Food administration, disclosed, adding that the proportion may have to be still greater.

Hendrickson told the war council of the American Retail federation that "as we move into Italy and Greece, France, Norway and the rest of Europe we must give those half-starved people the strength to be actively on our side."

The food distribution chief declared that the personnel of America's military forces eats an average of about 5 1/4 pounds of food daily, whereas civilians average between three and four pounds.

WHEAT LOANS: WFA Grants \$1.22

Loans to eligible farmers on 1943-grown wheat at rates averaging nationally \$1.22 per bushel at the farm were announced by the War Food administration.

Under a similar loan program in 1942, loans averaged \$1.14 at the farm. Eligible for loans will be farmers who complied with the 1943 AAA farm program relating to wheat and war crops. Loan rates vary according to grade, quality and location of storage.

Fight the Forgery Racket!

By FRANK J. WILSON
Chief, United States Secret Service

WHENEVER you pay out your good money for any government check, remember one thing:

Have the check initialed by the employee who pays out the money for it.

This will help you to place responsibility if the endorsement on the check should be declared a forgery. Also, it will be of much help when an investigation is conducted in an effort to arrest the check forger.

There is another pointer which is closely associated with this one. Here it is:

Try to write on the back of the check a brief description of the person who presents it, if that person is a stranger. For instance, you might write "WM—50—59"—heavy" meaning "White man about 50 years old, 5 feet 9 inches tall, of heavy build."

This will take only a few seconds and may be the means of tracing a forger and recovering your loss, if the check proves to bear a forged endorsement.

10. Why is no one allowed to whistle on board a navy ship?

The Answers

1. It is a hot African wind which fills the air with sand.
2. The Commonwealth of the Philippines is the only country in the world that flies its national flag upside down while at war.
3. Approximately 60 per cent.

Battleship a Menagerie

For over a century, seamen on British war vessels were permitted to own pets, with little restriction on their number and size, says Collier's. The practice was banned a few years ago, when the admiralty learned that one battleship carried an assortment of 1,560 animals, which included large snakes, bears, deer and antelopes.

SOMETHING TO KNOW ABOUT SEPTIC TANKS

If you have a septic tank, be careful what you use to keep toilets clean and sanitary. Here's good news. Recent scientific tests show that Sani-Flush saves nasty scrubbing and scouring, while it keeps toilet bowls clean as a whistle. And what is even more important—these tests prove Sani-Flush cannot injure septic tanks or the action that takes place in them when used according to the simple directions on the can. Use Sani-Flush at least twice a week. Sold everywhere. Two handy sizes. FREE: Write for complete scientific data on Sani-Flush in septic tanks. When Your Back Hurts - And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood. You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder. There should be no doubt that prompt treatment is wiser than neglect. **Doan's Pills**. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Get at all drug stores. Get Doan's today.

Favorite Apron

APRONS are certainly turning out to be fashion's pet these days and this one, with patchwork border, is one of the favorite models.

Barbara Bell Pattern No. 1741-B designed for sizes 14, 16, 18, 20, 42 and 44. Size 16 (34) requires 2 1/2 yards 35-inch material; 7 yards bias fold. Use scraps for bottom.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

Load of Heavy Bombers

Heavy bombers of the latest U. S. type weigh about 40,000 pounds and are capable of carrying 4,000 to 8,000 pounds of bombs for an estimated distance of 3,000 miles. They carry 11,000 gallons of gasoline—or 3,000 gallons more than the ordinary railroad gasoline tank.

Cross-Stitched Kitchen Towels

THESE kitchen towels will add a welcome touch of color to any kitchen. Do them in natural coloring. The easy cross stitch looks just like gingham applique. Everyone will admire them!

African Sergeant Major Is Permitted Four Wives

Among the troops who helped drive the Italians out of Ethiopia in 1940 were sturdy native soldiers from the African Gold Coast.

The British carefully refrain from interfering with their customs. About half of them are Moslems, others Christians, but their marriage customs are peculiarly their own.

Some of the non-Christians may have as many wives as they choose in private life. But in barracks they are "rationed" according to rank; that is, one wife for a private, two for a sergeant, and four for a sergeant-major.

The Gold Coast soldier is about average height. He goes to school for an hour a day under British tutors, and serves under British officers. He lives in cement and white plaster barracks that are pin-bright. His boots shine like glass and he is scrupulously clean.

Greeting Among Arabs

In North Africa, the ritual of greeting among Arabs demands that the man "looking down" should speak first, irrespective of his social status, says Collier's. Thus, the man on a camel greets first the man on a horse, the horseback rider nods first to the man on a donkey, the donkey rider bows first to the pedestrian and the pedestrian first to the man sitting down.

AROUND THE HOUSE

Never, never put electrical appliances into water to clean them. A damp cloth and a mild abrasive are sufficient in most cases. Guard wires against dampness.

Start root vegetables in boiling, salted water, about one teaspoon of salt to a quart of water.

So that they will not appear spotted, iron shantungs and pongees dry.

When drying a sweater or sweat shirt, use a wire coat hanger and bend the ends almost together while putting the garment on the hanger or removing it. This prevents stretching the neck of the garment.

Baked ham is glorified by pouring honey over the ham before browning. It gives a delicate brown color and a delicious flavor.

Smile Awhile

Nothing New Wife—I see by the paper that women are getting men's wages these days. Hubby—Humph, haven't they always?

These Days "I hear you've been doing very well at school, Alfred," said the fond grandparent. "What is your best subject—reading, writing or arithmetic?"

A look of quiet contempt crossed young Alfred's face as he replied: "Don't be so absurd, grandpa! I produced the best plan for post-war reconstruction."

Not Scented Girl Shopper—Do you have hyacinth bulbs? New Clerk—No, just electric.

A tourist stopped in front of a little country store, dumbfounded at the sight of an enormous display of salt piled on the premises. Stack after stack, boxes, barrels and bags. Tons of salt, inside the store and out. "You must sell a lot of salt," exclaimed the tourist. "No I don't sell much," replied the storekeeper, "but you should see the guy that came here last week. He really could sell salt."

The Question Mrs. Newlywed—How do you cook pork and beans? Mother-in-Law—Huh! How do you get 'em?

So, No Men He—The artists whose paintings show that angels are all women certainly didn't know women. She—That is perhaps true. It may be that they knew only men.

Even though it's true that the way to a man's heart is through his stomach, it doesn't mean he'll swallow anything.

Don't It? "Pessimism never pays." "Oh, I don't know! Look at all the women dentists make by looking down in the mouth."

At Ease She (thoughtfully)—Why do so many women rest their chins on their hands when they are thinking? He (brutally)—To keep their mouths shut so they won't disturb themselves.

SNAPPY FACTS ABOUT RUBBER

From 1907 to 1912, guayule rubber from Mexico represented about 7 per cent of the world's rubber supply. In 1941, it was less than 1 per cent.

More than 86,000,000 motor vehicles have been produced in the United States since 1900, with an average of five tires per vehicle. That gives you an idea of the number of tires that have been made to maintain motor transportation!

A Spanish historian back in 1519 described a ball made of the gum of a tree that grows in "hot countries." He was referring to what we now call rubber.

Farming Under Difficulty

Farming in England has been most difficult since the outbreak of the war. To prevent planes from landing in planted plots, many farmers have erected posts every few feet across their fields. In some instances the military has dug trenches or tank traps from one end of the farm to the other.

Grain cannot be stacked in large piles, and cattle cannot be kept in large herds for fear of their being destroyed by mass bombings. In spite of these and other ills, the United Kingdom has produced approximately 65 per cent of her own food requirements.

The first carrying of mail from one definite place to another by airplane took place over a 10-mile course on Long Island during a week's air meet in September, 1911.

Q. Is it proper to fly the flag of the United States of America outdoors all night long now that the United States is engaged in war?

A. No. The rules of civilian flag etiquette still govern, and the flag should be displayed outdoors only at sunrise until sunset. The only cases where the flag properly flies all night long are:

- (1) Two flags over the Capitol building in Washington; one over the east front and one over the west front, day and night throughout the year.
- (2) Over a permanent fort or ship when engaged in battle.
- (3) When our armed forces are engaged in battle.

Q. What interpretation is placed on that part of Sec. 2 (a) of Public Law No. 623 which reads: "the flag may be displayed at night upon special occasions when it is desired to produce a patriotic effect?"

A. The term "special occasions" means athletic events, bond campaign ceremonies, patriotic pageants, parade etc.

Q. Is it necessary for a person to stand and salute when a reproduction of the flag of the United States of America is flashed on a motion picture screen?

A. No; it is not necessary to salute reproductions or photographs of the flag.

Going Up

In almost every section of the country, farm land has shown an increase in sales during the past winter and spring. When the products from your farm increase in price, the value of farm land increases accordingly. The folks want to make hay. The last war taught some a sad lesson who bought heavily in land and mortgaged farms to buy more acreage. There was that business of inflation and then the usual aftermath—depression. Of course there were some farmers who held on and managed to clear the debt, raise crops, come clear again. But this was not the case of the majority and so well do some Palmyra farmers remember the taste of those bitter fruits of farm land price. We are believed to be smarter today, that we have learned our lesson and won't be found caught short a second time. They say lightning doesn't strike in the same place the second time, but they don't say that lightning doesn't strike!

New Price Ceilings

Complete tables showing reductions to be made in meat price ceilings are released by the Office of Price Administration.

Four sets of tables, showing the retail ceiling prices for beef, veal, lamb and mutton for stores in Classes 1 and 2 and Classes 3 and 4, and the retail ceiling prices for pork cuts for stores in Classes 1 and 2 and Classes 3 and 4 have been released for Zone 5, (which includes the Eastern two-thirds of Wisconsin. Zone Five includes all of Wisconsin except the following counties: Iron, Ashland, Bayfield, Douglas, Burnett, Washburn, Sawyer, Price, Taylor, Rusk, Barron, Polk, St. Croix, Pierce, Dunn, Chippewa, Clark, Jackson, Eau Claire, Pepin, Buffalo, Trempealeau, Monroe, Vernon, Crawford and La Crosse.

Bulletins for stores in Classes 1 and 2 are being distributed by price panel of Local War Price and Rationing Boards Bulletins for stores in Classes 3 and 4 will be distributed from district and regional OPA offices.

The reduction of meat prices will average 10 percent which will amount to an approximate saving of 3 cents a pound at retail for consumers. This reduction becomes effective June 21 in meat prices on all meats excepting cured pork and processed pork. Fresh pork cuts and pork used in variety meats will be reduced in price along with other meats on June 21.

Processed pork cuts, including all cured and smoked items, will be subject to the new price reductions July 5th.

Whereas the reduction in meat will be less than 3 cents a pound on some cheaper cuts, it will amount to more than 3 cents on some of the more expensive cuts. Typical reductions in price in Zone Five are indicated below:

	Old Price	New Price
Round Steak	.46	.41
Rib Roast	.41	.35
Hamburger	.32	.28
Veal Cutlet	.50	.44
Sliced Bacon	.46	.41

All of the above cuts are Grade A. The regulation requires that the selling price for pork cuts, fresh or smoked sausage, frankfurters and bologna, shown in the case, must be posted. In addition, each grade of sausage and each kind of casing separated within a show case must be marked with its grade letter and casing number so customers can see and read both letter and number.

After June 20, all fresh or smoked sausage, frankfurters and bologna must be labeled to show the kind of sausage, the grade (AA, A or B) and, wherever the grade affects the price, must also indicate the type of casing by numbers.

A label showing the grade and casing is required to appear twice on every piece of fresh sausage other than bulk, frankfurters or smoked sausage, and once on each piece of bologna or fresh sausage. In addition, the label on fresh sausage and bologna shall show the kind of sausage. The label must be left on the sausage.

Everybody's Headache

Weeds, dad-burn 'em! And that is what most Dads are busily doing at this time of year. We can neglect a number of things around here but the weed business is not one of them, at least not without some unpleasant after effects. Overlook certain improvements around the property, around the town, but where weeds are permitted to flourish we are issuing an invitation to discomfort and disease. Realize that weeds are breeding spots for flies and mosquitoes and that with them generally you will find pools of stagnant water that breed fever on its surface. Busy with gardens this year the No. 1 back-breaking rule accompanying the art of victorious gardening and which no enthusiast can ignore is to take the weed problem into his reckoning. Get them early before they take the place.

FISHING FOR DEAR LIFE

That favorite sport, fishing, has enlisted and has gone to war. The Medical and Surgical Relief Committee of America makes an appeal for the salvaging of fishing tackle. Recall the crews of torpedoed ships that managed to survive by catching fish from their life rafts? Fish contain a quantity of water which has been wrung from the meat and given drink to the shipwrecked men. This committee is inclosing a simple fishing kit with its outfit of necessary drugs and emergency surgical instruments. They are supplying Coast Guard patrol boats and Navy sub-chasers.

A Sore Subject

If there is one topic that causes a show of temper from many citizens it is the one of Strikes. This subject is almost unavoidable when a group starts in on current events. Conversation waxed warm over some group of employees who are stopping work until their demands are met. Sometimes these are imagined and uncalled for and you can't blame the public for doing a lot of exclaiming since justifiable claims are often covered by the actions of some strikers over minor complaints which should be adjusted without the fanfare. Matters should be peacefully settled and never allowed to reach the stage of stopping work and jeopardizing the lives of one or one thousand men on our battle lines. We heard a local man remark that we would be in a fine fix if big brains would call a halt. He mentioned the Rockefeller Foundation, Mayo Clinic, the Henry Fords, engineers writers surgeons scientists, chemists. Many of them can show that as far as money is concerned they are underpaid. They spend long hours of research and are not named in the time and a half for overtime class. Certainly they can prove that having a talent for inventiveness, for genius in many cases, for superior intellect, does not mean labor is easy and their manner of living higher in standard than many other types of workers. They are not organized though perhaps your union members would remark that they would be more intelligent if they were! In most such cases the individual seems to be considering benefiting others than themselves with their skill and knowledge. As a rule, they are spending their time and education trying to improve the living standard of their fellows.

FREEDOM FROM FEAR

THAT'S WHAT HIS DAD IS FIGHTING FOR
His dad is fighting so that kids all over the world don't have to live in cellars and subways in constant fear of their lives.
We, too, must carry our share of the duty and buy all the War Bonds and Stamps we can so this world will be a better and happier place in which to live.
