

EarleHouseHy67

 **Date:** about 1900

 **Place:** 4 mi N Eagle on 67

 **Description:** We saw inside about 1996. Not even modernized then. It went up for sale about 2005...I though about buying, but it was a lot of money, needed \$200k new work. Probably not insulated walls, or a decent kitchen or bath. There is a lannon stone quarry about 600 feet south that provided the building stone. I have photos of that.
